

ACTIVITY 15 - BISCUITS

The Patel family took a packet of biscuits on a car journey. There were 28 biscuits in the packet. The children had the packet first and ate lots of biscuits before giving what was left to their parents. When Mr and Mrs Patel got the packet from the children there were 6 biscuits left.

How many had the children eaten?

HINT

Draw a bar model to represent the numbers of biscuits – those in the packet to start with, the ones that the children ate and those that were left for the adults.
