

ACTIVITY 16 - HORSES AND JOCKEYS

18 horses started a race, each with a jockey on their back. Only 7 horses finished the race with their jockeys still on their backs. The other jockeys had fallen off and the horses had run to the finish line without them.

How many horses crossed the finish line without their jockeys?

You know how many horses started the race with jockeys and how many of them finished the race with their jockeys. So, what do you know about the other horses?
