

## ACTIVITY 17 - TOAST

Everyone in the Johnson family likes toast for their breakfast, with either jam or marmalade. Two people say their favourite spread is jam. There are four more marmalade-lovers than jam-lovers.

**How many people are in the family altogether?**

You know that all the family members love marmalade or jam and you know how many love jam, so you can work out how many love marmalade. First, draw the bar to represent how many love jam. Then, draw another bar under the first to show how many love marmalade. Can you see what you need to do next to be able to answer the question?

**HINT**
