

ACTIVITY 18 - CAR FERRY

On holiday, Natalie and her family went on a car ferry. On board, there were 50 cars, 6 vans and some motor bikes. Altogether, there were 75 vehicles.

How many of them were motor bikes?

HINT

You know what the total number of vehicles is and you know that there were 3 different kinds of vehicles so you can draw a bar to represent those 3 kinds of vehicles, showing the numbers that you know. What do you need to do next to be able to answer the question?
