

ACTIVITY 21 - DIGGERS AND TRACTORS

Tom and Finley were sorting the wheeled toys in the outdoor area. They found 13 tractors and 17 diggers.

How many more diggers were there than tractors?

**HINT**

Start by drawing a bar to represent the number of tractors. Next, underneath, you should draw another bar to represent the number of diggers. Then you will be able to see how many more diggers there are than tractors and count them. This is the answer to the question.
