

**ACTIVITY 22 - APPLE PIES**

In the autumn Nana likes the grandchildren to help her pick the apples in the garden to make yummy apple pies for the freezer. Ayesha was very pleased with herself when she counted the apples in her bucket – she had picked 25 apples. Her brother Lemar had picked even more – he counted 32 in his bucket.

**How many more apples had Lemar picked than Ayesha?**

Start by drawing a bar to represent Ayesha's apples. Next, underneath, you should draw another bar to represent Lemar's apples. Then you will be able to see how many more apples are in Lemar's bucket than in Ayesha's and count them.
