

ACTIVITY 23 - BOOK SALE

At Belinda's school, every class was asked to bring in any books that they no longer needed to be sold at a book sale to raise money. The class that brought in the most books would win a prize. Belinda's class did very well – they brought 77 books from home. But the class who won the prize brought in 12 more books.

**How many books did they bring to school?**

Start by drawing a bar to represent the 77 books that Belinda's class brought into school. Next, underneath, you should draw another bar to represent the winning class's books – will it be longer or shorter than Belinda's class's bar? By how many? Then you will be able to see how many books are represented by that bar.
