

ACTIVITY 28 - CINEMA TICKETS

Zoe, Mia and Sam went to the cinema with Zoe's Mum, and Zoe's Mum paid the bill for everyone. Mia and Sam wanted to pay Zoe's Mum for their tickets. The bill showed that the total cost had been £30 and that adult tickets were twice the price of children's tickets.

Can you work out what each ticket cost?

HINT

Think about the cost of an adult ticket compared to a child ticket - how would you represent this on a bar?
