

ACTIVITY 3 - SEASHELLS

Denise collects seashells from the beach when she goes on her holidays. She has 52 beautiful seashells in her collection. Most of them are cockle-shells. There are 14 shells of other kinds.

How many are cockle-shells?

You will need to draw a bar to represent all of the shells. How many sections will the bar be divided into? Draw your bar model, filling in the information that you know, starting with the shells that are not cockle-shells.
